"Unless otherwise noted, Scripture quotations are from the New King James Version of the Bible."--T.p. verso.

This workbook bring students face to face with the study of general science by researching a variety of topics and words. The main purpose of this book is to help student develop confident science spelling skills and knowledge. The science vocabulary words in this book range from EASY to more ADVANCE, however, the goal is to also make sure student understand the scientific meaning behind even the simplest everyday words. Students as young as 3rd grade are able to work through this book with some help from their learning coach and students as old as in middle school to high school freshman are benefiting from this book too. Many students are on different learning levels and paths and some students that are older need a refresher before they are able to advance into biology. Some science vocab words topics are: - Earth science - Chemistry - Astronomy - Environmental - Energy The Cool Science workbook feature various activities such as: - Science multiple choice test - Science Crossword puzzles - Science Word search puzzles - Science Unscramble worksheet - Writing research exercises: student can write sentences, definitions and context clues for science words. - Bonus: Grade tracker sheets so you can track grades - Bonus: Assignment planner sheets so you can write your student additional science assignments

This Survey of Astronomy Curriculum Guide contains materials for use with Taking Back Astronomy, Our Created Moon, The Stargazer's Guide to the Night Sky, Our Created Moon DVD, Created Cosmos DVD. Features: Each suggested weekly schedule has three easy-to-manage lessons which combine reading, worksheets, and vocabulary-building opportunities including an expanded glossary for each book. Designed to allow your student to be independent, materials in this resource are divided by section so you can remove quizzes, tests, and answer keys before beginning the coursework. As always, you are encouraged to adjust the schedule and materials as you need to in order to best work within your educational program. Workflow: Students will read the pages in their book and then complete each section of the study guide worksheets. Tests are given at regular intervals with space to record each grade. Younger students may be given the option of taking open book tests.

A fresh and compelling look at wild and awesome examples of weather in this revised and updated book in the Wonders of Creation series! Did you know the hottest temperature ever recorded was 134° F (56.7° C) on July 10, 1913 in Death Valley, California? The highest recorded surface wind speed was in the May 3, 1999, Oklahoma tornado, measured at 302 mph (486 kph)! The most snow to fall in a one-year period is 102 feet (3,150 cm) at Mount Rainier, Washington, from February 19, 1971 to February 18, 1972! From the practical to the pretty amazing, this book gives essential details into understanding what weather is, how it works, and how other forces that impact on it. Learn why storm chasers and hurricane hunters do what they do and how they are helping to solve storm connected mysteries. Discover what makes winter storms both beautiful and deadly, as well as what is behind weather phenomena like St. Elmo's Fire. Find important information on climate history and answers to the modern questions of supposed climate change. Get safety tips for preventing dangerous weather related injuries like those from lightning strikes, uncover why thunderstorms form, as well as what we know about the mechanics of a tornado and other extreme weather examples like flash floods, hurricanes and more. A fresh and compelling look at wild and awesome examples of weather in this revised and updated book in the Wonders of Creation series!

"This book is meant to be an introduction only - a starting point to a biblical view of the universe. . . . Who knows what amazing truths are waiting to be discovered if only the shackles of secular thinking are removed. Now is the time of discovery..." Take a breathtaking look at the universe that is comprehensive guide to the heavens! Sit back and explore the world at your fingertips in this book which: Explains the scale and size of the universe that is hard for our minds to imagine - yet can only indicate the Master's hand at work. Over 50 full-color, rarely seen photos of stars, nebulas, and galaxies. Filled with facts that challenge secular theories and models of the universe - how it began and how it continues to amaze the scientific community. Explores numerous evidences that point to a young universe: magnetic poles of planets, the spiral shape of galaxies, comets and how long scientists think they can last, and much more. With a doctorate in astrophysics from the University of Colorado, Dr. Jason Lisle is your guide to the universe beyond our world in this remarkable book. Step out among the stars and experience the truly awesome power of God through this glimpse of His vast creation.

In Level K young students will learn about the world they can see and experience around them as the course lays the groundwork for future learning with lots of fun. Includes a helpful vocabulary component as well as activities and worksheets to apply their knowledge. Encourages students to actively work in their Science Notebook, and offers extended learning opportunities through Digging Deeper. Hidden Treasures focus on biblical connections and a relationship with God

Explains some basic "hows and whys" in natural history and geology.

This book begins with a lesson on the nature of astronomy, and then it covers the major structures of our solar system. Starting with the sun and working towards Pluto, the student will learn details about all nine planets (or is it eight? - your student will have to decide) in the solar system. Along the way, the student will also learn about Earth's moon, the asteroid belt, and the Kuiper belt. After that, the student will move outside our solar system and learn about the stars and galaxies that make up God's incredible universe. Finally, the student will learn about space travel and what it takes to be an astronaut! The activities and projects use easy-to-find household items and truly make the lessons come alive! They include making a solar eclipse, simulating the use of radar to determine a hidden landscape, and making a telescope. We recommend that you spend the entire school year covering this book, devoting approximately two sessions per week to the course.

Unique biblical studies course for students! Are there really contradictions in the Bible, and can it be relied upon for historical accuracy? What is scriptural authority; does it matter? How does a skeptical world impact your view? The Bible is increasingly under attack from every direction. Whether secular scholars or those in the Church try to tie in evolutionary concepts to match origin explanations that are not biblical, the accuracy and relevance of the Bible is at question. This course covers both volumes of How Do We Know the Bible Is True?, as well as Demolishing Supposed Bible Contradictions. Learn important details that can strengthen your confidence in the Bible's inerrant nature. Discover how the Bible proves itself, and the insight you need to strengthen your faith and defend God's Word!
