When you program in the Business Object Layer you often use class `CL_CRM_BOL_CORE` e.g. for starting up the BOL or retrieve a Root Object. The latter is done using method `GET_ROOT_ENTITY` and requires the internal GUID of the object. Method `GET_ACCESS_ENTITIES` however retrieves objects using business keys like shown in the BOL Model Browser. This method can handle Access Objects, like the name suggests, but also Root Objects.

ROBOGUIDE is the leading of offline programming product on the market for FANUC robots. The ROBOGUIDE family of process focused software packages allows users to create, program and simulate a robotic workcell in 3-D without the physical need and expense of a prototype workcell setup. With virtual robots and workcell models, of offline programming with ROBOGUIDE reduces risk by enabling visualization of single and multi-robot workcell layouts before actual installation.

Definition - What does Bolt-On mean? Bolt-on software is software that can be easily attached to a client project, for example, a website. The term “ bolt-on ” is similar to the term “ plug-and-play ” that is used to describe pieces of software that are easily integrated into other larger systems. Some might also call these “ add-ons. ”
