refugees swarm the city, tossed into a world they haven't seen in years, and one Jana knows only from distant memories as a child. The ones who tore down her home would have her flee to safety, and to abandon her need to find Rhamiel and know what became of him. But the strike against the angels has returned them to their martial ways, and an army is reforming under the banner of Uzziel with the goal of eliminating any threats to the Seraphim forever. And other castes of angels have agendas of their own, eager to fill the vacuum left by the tower's collapse.

This volume brings John Milton's Paradise Lost into dialogue with the challenges of cosmology and the world of Galileo, whom Milton met and admired: a universe encompassing space travel, an earth that participates vibrantly in the cosmic dance, and stars that are

"world[s] / Of destined habitation." Milton's bold depiction of our universe as merely a small part of a larger multiverse allows the removal of hell from the center of the earth to a location in the primordial abyss. In this wide-ranging work, Dennis Danielson lucidly unfolds early modern cosmological debates, engaging not only Galileo but also Copernicus, Tycho, Kepler, and the English Copernicans, thus placing Milton at a rich crossroads of epic poetry and the history of science.

Alexander the Great, according to Plutarch, carried on his campaigns a copy of the Iliad, kept alongside a dagger; on a more pronounced ideological level, ancient Romans looked to the Aeneid as an argument for imperialism. In this major reinterpretation of epic poetry beginning with Virgil, David Quint explores the political

context and meanings of key works in Western literature. He divides the history of the genre into two political traditions: the Virgilian epics of conquest and empire that take the victors' side (the Aeneid itself, Camoes's *Lus í adas*, Tasso's *Gerusalemme liberata*) and the countervailing epic of the defeated and of republican liberty (Lucan's *Pharsalia*, Ercilla's *Araucana*, and d'Aubign é 's *Les tragiques*). These traditions produce opposing ideas of historical narrative: a linear, teleological narrative that belongs to the imperial conquerors, and an episodic and open-ended narrative identified with "romance," the story told of and by the defeated. Quint situates *Paradise Lost* and *Paradise Regained* within these rival traditions. He extends his political analysis to the scholarly revival of medieval epic in the late eighteenth and nineteenth centuries and to Sergei Eisenstein's epic film, *Alexander Nevsky*. Attending both to the

topical contexts of individual poems and to the larger historical development of the epic genre, *Epic and Empire* provides new models for exploring the relationship between ideology and literary form.

Chaos is a perennial source of fear and fascination. The original "formless void" (tohu-wa-bohu) mentioned in the book of Genesis, chaos precedes the created world: a state of anarchy before the establishment of cosmic order. But chaos has frequently also been conceived of as a force that persists in the cosmos and in society and threatens to undo them both. From the cultures of the ancient Near East and the Old Testament to early modernity, notions of the divine have included the power to check and contain as well as to unleash chaos as a sanction for the violation of social and ethical

norms. Yet chaos has also been construed as a necessary supplement to order, a region of pure potentiality at the base of reality that provides the raw material of creation or even constitutes a kind of alternative order itself. As such, it generates its own peculiar 'formations of the formless'. Focusing on the connection between the cosmic and the political, this volume traces the continuities and re-conceptualizations of chaos from the ancient Near East to early modern Europe across a variety of cultures, discourses and texts. One of the questions it poses is how these pre-modern 'chaos theories' have survived into and reverberate in our own time.
