Exam Board: Edexcel Level & Subject: International GCSE Biology and Double Award Science First teaching: September 2017 First exams: June 2019

The routine jobs of yesterday are being replaced by technology and/or shipped off-shore. In their place, job categories that require knowledge management, abstract reasoning, and personal services seem to be growing. The modern workplace requires workers to have broad cognitive and affective skills. Often referred to as "21st century skills," these skills include being able to solve complex problems, to think critically about tasks, to effectively communicate with people from a variety of different cultures and using a variety of different techniques, to work in collaboration with others, to adapt to rapidly changing environments and conditions for performing tasks, to effectively manage one's work, and to acquire new skills and information on one's own. The National Research Council (NRC) has convened two prior workshops on the topic of 21st century skills. The first, held in 2007, was designed to examine research on the skills required for the 21st century workplace and the extent to which they are meaningfully different from earlier eras and require corresponding changes in educational experiences. The second workshop, held in 2009, was designed to explore demand for these types of skills, consider intersections between science education reform goals and 21st century skills, examine models of high-quality science instruction that may develop the skills, and consider science teacher readiness for 21st century skills. The third workshop was intended to delve more deeply into the topic of assessment. The goal for this workshop was to capitalize on the prior efforts and explore strategies for assessing the five skills identified earlier. The Committee on the Assessment of 21st Century Skills was asked to organize a workshop that reviewed the assessments and related research for each of the five skills identified at the previous workshops, with special attention to recent developments in technology-enabled assessment of critical thinking and problem-solving skills. In designing the workshop, the committee collapsed the five skills into three broad clusters as shown below: Cognitive skills: nonroutine problem solving, critical thinking, systems thinking Interpersonal skills: complex communication, social skills, team-work, cultural sensitivity, dealing with diversity Intrapersonal skills: self-management, time management, self-development, self-regulation, adaptability, executive functioning Assessing 21st Century Skills provides an integrated summary of the presentations and discussions from both parts of the third workshop.

A student-friendly and engaging resource for the 2016 Edexcel GCSE Geography B specification, this brand new course is written to match the demands of the specification. As well as providing thorough and rigorous coverage of the spec, this book is designed to engage students in their learning and to motivate them to progress.

Exam board: Edexcel Level: A-level Subject: Design and Technology First teaching: September 2017 First exams: Summer 2019 Target success in Edexcel A-level Design and Technology (Product Design) with our proven formula for effective, structured revision. Key content coverage is combined with exam-style tasks and practical tips to create a revision guide that students can rely on to review, strengthen and test their knowledge. With My Revision Notes, every student can: - plan and manage a successful revision programme using the topic-by-topic planner - consolidate subject knowledge by working through clear and focused content coverage - test understanding and identify areas for improvement with regular 'Now Test Yourself' tasks and answers - improve exam technique, including interpretation and application, through practice questions, sample answers and exam tips.

Providing complete coverage of the 2009 Edexcel IGCSE maths specification, this engaging work makes the information accessible for every student. It contains exam practice throughout, with revision questions and practice exam questions.

Set in the final, numbered, days of an orphanage in the Warsaw ghetto in 1942, this play is based on real events. It's 'alienation' device of depicting its characters through the use of dolls, further enhances our painful feeling of powerlessness. Yet, in spite of its tragic outcome, it leaves us uplifted by the power of love.

Endorsed for Edexcel Nurture and strengthen your students' mathematical skills; these expert-written textbooks consolidate knowledge with worked examples, test key skills through practice and extend learning using enrichment activities designed to excite and challenge students. - Support and develop a deeper understanding of topics with plenty of worked examples and practice questions that follow the types of problems students are likely to face - Introduce students to content with fun activities and clear learning objectives at the start of each chapter - Build problem-solving skills with questions that test students' knowledge and comprehension - Further understanding and ignite an enthusiasm for maths with 'internet challenges' that extend learning beyond the curriculum and help to engage students - Offer a complete package of support with free downloadable resources that include detailed worked examples and answers, plus informative 'Personal Tutor' videos for each chapter
