Maps  
separate colors  
distinguish the main  
classes of map features.

The amount of  
information shown on a  
topographic map  
depends on the map  
scale, the purpose of the  
map, and the cost of  
obtaining the  
information.

## **FEATURES SHOWN ON TOPOGRAPHIC**

# Get Free Features Shown MAPS - USGS

Topographic maps depict four main types of features: Landforms: hills, valleys, gullies, ridges... Water courses: rivers, swamps, coastal... Vegetation: national parks, farmland, plantations... Manmade: buildings, roads, property boundaries, political boundaries...

more. Older maps  
(published before 2006)  
show additional features  
such as trails, buildings,  
towns, mountain  
elevations, and survey  
control points.

## **What is a topographic map? - USGS**

A topographical map is one that shows the physical features of the land. Besides just

# Get Free Features Shown

On Topographic  
Maps  
showing landforms such as mountains and rivers, the map also shows the elevation changes of the land. Elevation is shown using contour lines.

When a contour line is drawn on a map it represents a given elevation.
