According to Ranganathan, a careful philosophical study of Hinduism reveals it as the microcosm of philosophical disagreements with Indian resources, across a variety of topics, including: ethics, logic, the philosophy of thought, epistemology, moral standing, metaphysics, and politics. This analysis offers an original and fresh diagnosis of studying Hinduism, colonialism, and a global rise of hyper-nationalism, as well as the frequent acrimony between scholars and practitioners of Hindu traditions. This text is appropriate for use in undergraduate and graduate courses on Hinduism, and Indian philosophy, and can be used as an advanced introduction to the problems of philosophy with South Asian resources.

At the end of a five-year journey to find out what religious Americans think about science, Ecklund and Scheitle emerge with the real story of the relationship between science and religion in American culture. Based on the most comprehensive survey ever done—representing a range of religious traditions and faith positions—Religion vs. Science is a story that is more nuanced and complex than the media and pundits would lead us to believe. The way religious Americans approach science is shaped by two fundamental questions: What does science mean for the existence and activity of God? What does science mean for the sacredness of humanity? How these questions play out as individual believers think about science both challenges stereotypes and highlights the real tensions between religion and science. Ecklund and Scheitle interrogate the widespread myths that religious people dislike science and scientists and deny scientific theories. Religion vs. Science is a definitive statement on a timely, popular subject. Rather than a highly conceptual approach to historical debates, philosophies, or personal opinions, Ecklund and Scheitle give readers a facts-on-the-ground, empirical look at what religious Americans really understand and think about science.

It also describes the lives of the students in the campus and its academic, intellectual, and cultural atmosphere. As technologies are introduced and improved, they continue to raise pressing questions about the impact, both positive and negative, that they have on the lives of those that use them. The book also deals with some of the more futuristic and speculative topics related to transhumanism and digitalization. Including an international group of contributors from a variety of disciplines, chapters address the intersection of religion and digital media from multiple perspectives. Divided into two sections, the chapters included in the first section of the book present case studies from five major religions: Christianity, Islam, Buddhism, Hinduism and Judaism and their engagement with digitalization. The second section of the volume explores the moral, ideological but also ontological implications of our increasingly digital lives. This book provides a uniquely comprehensive overview of the development of religion and spirituality in the digital age. As such, it will be of keen interest to scholars of Digital Religion, Religion and Media, Religion and Sociology, as well as Religious Studies and New Media more generally, but also for every student interested in the future of religion and spirituality in a completely digitalized world.
