Kawasaki KMX -
Wikipedia

In restricted (12bhp) form the 125 did 71mph and 50mpg, but most were easy to derestrict (once you'd passed your

Online Library Kawasaki Kmx

test, of course) at which point they were making 20bhp and would do an easy 80mph. The KMX200 didn't go that much faster but it did have a lot more bottom end power and stronger acceleration.

The 200cc has stonger clutch springs, but if your using the 125 bottom end, id just order yourself a new clutch kit anyway. The exhaust is slightly different between

the 125 and 200
and so is the
diameter of the
stinger. But an
aftermarket can
should mate up to
the 200 front pipe
easily enough.
