Compiled & Edited by F. William Payne. Natural gas technologies that were new five years ago have now been tested in the real world. This book describes some of these important technologies, covering both new engineering concepts and new products which have emerged, as well as important innovations to existing technologies. Many of the chapters include economic analyses which identify the resulting cost savings. Specific areas of development addressed include gas cooling, chillers, desiccant technologies, cogeneration, heating systems, and other natural gas technologies.

International Marketing by Dr. I.M. Sahai is a publication of the SBPD Publishing House, Agra. The Book Code for the book is 4870.

Packed full of relevant and modern information that can make any trip to Shanghai enjoyable. - 7 days in Shanghai: Seven day itinerary, packed with details on what to see, where to go and how to get there and where to eat. - General Knowledge - Transportation: provides details and photography for taxi, the metro and bus system, as well as other modes of transportation in the city (including Accessibility Access). - Housing: Modern information on Housing and Hotels, for your stay. - Eat/Drink: Places to eat and drink (including vegetarian options). - Coffee in Shanghai - Shopping: Shopping (including suits and clothing making), - Explore: Places to Explore in both Puxi and Pudong - Art: The Art Scene - History - District Highlights - Physical Security & Safety - Local/Expat Guide - In/Out - Useful Stuff Your Best Guide to Shanghai is Your Best Guide to Shanghai!

**This new reference book providing detailed descriptions of the top 100 major business enterprises in China is a companion book of the recently published Biographical Dictionary of New Chinese Entrepreneurs and Business Leaders (by the same editors). Together, these two publications provide in-depth and up-to-date information for the study and understanding of the fabric of the business sector of China. --

How green is green? The average homeowner is usually well-informed about which products and concepts are considered "green," but they seem to have less of an understanding of how they compare, and which things work the best for the lowest investment. Did you know that 40 percent of the average home power bill is dedicated to air conditioning in warm climates? Further, energy is spent on cooking, hot water, clothes dryers, and such. Did you know that solar hydronic panels are way more efficient than solar voltaic panels? How about instantaneous water heaters? Are they good? Homeowners need to make dozens of decisions about which products or services they need in order to make their home the most efficient it can be for the given budget. Do you have mold or humidity problems? If you want to learn about things like the home envelope, HVAC, hot water, and electrical systems, this book is for you. It is written in plain English, and covers all the bases. Also, given are tips on saving the environment from an engineer's perspective. The author is a big fan of the environment, but does not like "greenwashing." The generic definition of greenwashing is the practice of making an unsubstantiated or misleading claim about the environmental benefits of a product, service, or technology. Pros and cons of various "green" products are discussed so that the homeowner can understand the smartest purchases and practices. One of the things you will learn is that the envelope of the home is just as important as the HVAC. You have to understand both to be successful. The envelope is thoroughly discussed as well as HVAC, plumbing, electrical, and the various green technologies.

* A broad range of disciplines--energy conservation and air quality issues, construction and design, and the manufacture of temperature-sensitive products and materials--is covered in this comprehensive handbook * Provide essential, up-to-date HVAC data, codes, standards, and guidelines, all conveniently located in one volume * A definitive reference source on the design, selection and operation of A/C and refrigeration systems
