Documentation for developers that describes how to use the Oracle Service Bus Console and Oracle JDeveloper to create and configure proxy and business services, split-joins, and pipelines; perform message transformation with XQuery, XSLT, and MFL; configure transports, work with JCA adapters, and create custom transports; configure security using WS-Security; use the Service Bus API; and create global JNDI resources.

**Oracle Service Bus 12.2.4**

Documentation that helps SOA developers and administrators to install and start using Oracle Service Bus 12c (12.2.1.3).

**Oracle Service Bus 12.2.1.3.0 – Get Started**

Oracle Service Bus. Oracle Service Bus transforms complex and brittle architectures into agile integration networks by connecting, virtualizing, and managing interactions between services and applications. Oracle Service Bus delivers low-cost, standards-based integration for mission critical SOA environments where extreme performance, scalability and reliability are critical requirements.

**Oracle Service Bus**

Oracle Service Bus provides a framework to wrap utility Java code into custom XPath functions, which can be reused across inline XQuery expressions and XQuery Mapper transformations used in message flows and Split-Joins. The custom XPath functions are available in the design tooling (Console and IDE).

**Oracle Service Bus Documentation | voucherslug.co**

Oracle Service Bus Documentation - auto.jobuhlig.com Documentation that helps SOA developers and administrators to install and start using Oracle Service Bus 12c (12.2.1.3). Oracle Service Bus 12.2.1.3.0 - Get Started Oracle Service Bus architecture is centered around an Enterprise Service Bus. The bus provides message delivery services, based

**Oracle Service Bus Documentation – nsaidalliance.com**

Oracle Service Bus is designed to connect, mediate, and manage interactions among heterogeneous services, legacy applications, and multiple enterprise service bus instances across an expanding service network with built-in support for high performance and low risk incorporation of cloud services.

**Oracle Service Bus Data Sheet**

Oracle Service Bus Console enables Oracle Service Bus resource configurations to be saved as metadata and exported in JAR files to other Oracle Service Bus domains. This functionality supports an orderly promotion process of Oracle Service Bus resource configurations from staging and test environments into production and minimizes the expertise, time, and resources needed to achieve various deployment scenarios.

**Oracle Service Bus Architecture**

The distributions for both Oracle Fusion Middleware Infrastructure and Oracle Service Bus are available as jar files. You must have a certified JDK already installed on your system in order to install and configure this distribution.

**Planning Your Oracle Service Bus Installation**

Documentation for developers that describes how to use the Oracle Service Bus (OSB) development environment (IDE) to create and configure proxy and business services, Split-Joins, create message flows, perform message transformation with XQuery, XSLT, and MFL, configure transports, work with JCA adapters, create custom transports, configure security using WS-Security, use the Oracle Service Bus API, and create global JNDI resources.

**Oracle Fusion Middleware Online Documentation Library**

Oracle Service Bus. Oracle Service Bus transforms complex and brittle architectures into agile integration networks by connecting, virtualizing, and managing interactions between services and applications. Oracle Service Bus delivers low-cost, standards-based integration for mission critical SOA environments where extreme performance, scalability and reliability are critical requirements.

**Oracle Service Bus | Oracle India**

Oracle Service Bus transforms complex and brittle architectures into agile integration networks by connecting, virtualizing, and managing interactions between services and applications.

**Oracle Service Bus | Oracle Nederland**

Oracle Service Bus (abbreviated OSB) is an enterprise service bus used by Oracle Corporation. Formerly named AqualLogic Service Bus, Oracle acquired this technology when it bought BEA Systems.

**Oracle Service Bus – Wikipedia**

Oracle Service Bus: A quickstart for the Kafka transport As mentioned on the following blog post by Lucas Jellema, Kafka is going to play a part in several Oracle products. For some usecases (e.g. IoT scenario's) it might even replace JMS.
