Beginners*

PHP uses the `setcookie()` function to set new cookies and update existing cookies.

Online Library Php Mysql For Dummies R 4th Edition

Here's the basic format of the `setcookie()` function: `>setcookie(name [, value] [, expire] [, path] [, domain] [, secure] [, httponly])` The only required parameter is the name of the cookie, although you'll almost always want to include a cookie value, too.
