Never HIGHLIGHT a Book Again! Virtually all of the testable terms, concepts, persons, places, and events from the textbook are included. Cram101 Just the FACTS101 studyguides give all of the outlines, highlights, notes, and quizzes for your textbook with optional online comprehensive practice tests. Only Cram101 is Textbook Specific. Accompanys: 9780073222707 9780078203404 .

This one-semester survey of principles of physics for technical students emphasizes practical applications that represent a broad coverage of physics as it relates to the various technical areas. The concepts presented allow students to relate the principles of physics to practical job-related applications. The questions and problems at the end of each chapter have been carefully chosen for their realistic application to industry and for their instructional value. The only mathematics prerequisite is the algebra necessary to understand simple formulas. For teaching convenience, the more difficult sections of the text, which are optional, are identified by asterisks in the table of contents.

From the international bestselling author of The Architecture of Happiness and How Proust Can Change Your Life comes this lyrical, erudite look at our world of work. We spend most of our time at work, but what we do there rarely gets discussed in the sort of lyrical and descriptive prose our efforts surely deserve. Determined to correct this lapse, armed with a poetic perspective and his trademark philosophical sharpness, Alain de Botton heads out into the world of offices and factories, ready to take in the beauty, interest, and sheer strangeness of the modern workplace. De Botton spends time in and around some less familiar work environments, including warehouses, container ports, rocket launch pads, and power stations, and follows scientists, landscape painters, accountants, cookie manufacturers, therapists, entrepreneurs, and aircraft salesmen as they do their jobs. Along the way, de Botton tries to answer some of the most urgent questions we can pose about work: Why do we do it? What makes it pleasurable? What is its meaning? To what end do we daily exhaust not only ourselves but also our planet? Equally intrigued by work's pleasures and its pains, Alain de Botton offers a characteristically lucid and witty tour of the working day and night, in a book sure to inspire a range of life-changing and wise thoughts.

"College Physics," Second Edition is the best solution for today's college physics market. With a unique, new, approach to physics that builds a conceptual framework as motivation for the physical principles, consistent problem solving coverage strategies, stunning art, extensive end-of-chapter material, and superior media support, Giambattista, Richardson, and Richardson delivers a product that addresses today's market needs with the best tools available..
