Programming GPS and OpenStreetMap Applications with Java The RealObject Application Framework Kristof Beiglbock | CRC Press | J Taylor & Francis Group | Boca Raton London New York CRC Press is an imprint of the Taylor & Francis Group, an Informa business AN ? PETERS BOOK

Programming GPS and OpenStreetMap Applications with Java

This book demonstrates how to create distributed Java applications with GPS clients and map servers to simulate a GPS Tracking System (GTS). Besides introducing basics of GPS and cartography the book describes how to process digital map data for dedicated applications with A Map Compiler for OpenStreetMap. The reader can set up his own map compilation process to create his individual Physical Storage Format (PSF) with different layers (map, admin, network) for offline navigation and much more.
