System Requirements Engineering presents a balanced view of the issues, concepts, models, techniques and tools found in requirements engineering research and practice. Requirements engineering is presented from business, behavioural and software engineering perspectives and a general framework is established at the outset. This book considers requirements engineering as a combination of three concurrent and interacting processes: eliciting knowledge related to a problem domain, ensuring the validity of such knowledge and specifying the problem in a formal way. Particular emphasis is given to requirements elicitation techniques and there is a fully integrated treatment of the development of requirements

An introductory text that explores Psychology's major theories, and the evidence that supports and refutes them. This title incorporates research, helping students to probe for the purposes and biological origins of behavior - the 'whys' and 'hows' of Human Psychology.

Introduction to Industrial/Organizational Psychology provides an accessible approach to psychological theory and its applications to the world of work. Using both classic theories and research along with the latest developments and innovations, this student-centered text shows practical applications of theoretical concepts using examples from work situations that students may be familiar with—such as service industries, internet companies, and startups—in addition to traditional office and factory work settings. Each chapter includes key terms and review questions, and the text features special sections highlighting applications of I/O psychology theories, psychological approaches to everyday work situations, and current areas of research and practice. The seventh edition is thoroughly updated to include the latest research on each key topic. It also includes expanded coverage of international issues, job engagement, and emerging topics in the field, such as workplace bullying, virtual teams and organizations, agile organization structures, and web-based training and assessment. The book will be of interest to undergraduate students in introductory I/O psychology or psychology of work behavior courses. For additional resources, please consult the Companion Website at www.routledge.com/cw/riggio, where instructors will find an expanded instructor's manual, test bank, and lecture slides, and students will find chapter summaries and learning objectives. Ronald E. Riggio is the Henry R. Kravis Professor of Leadership and Organizational Psychology at Claremont McKenna College. students in the psychology and counseling fields, for whom the value of psychological research is not always readily apparent. Contributed to by experts in their respective fields, this text presents research as an indispensable tool for practice, a tool that is used every day to advance knowledge and improve assessment, treatment choice, and client outcomes. The book is divided into four logical parts: Research Foundations, Research Strategies, Research Practice, and finally, Special Problems. Included is a chapter that addresses one of the most important controversies, the distinction between realistic and “gold standard” efficacy studies. The remainder of the book addresses salient issues such as conducting research in various cultures, operating an empirically-oriented practice, and performing research with families, children, and the elderly. Students and professors will find the coverage ample and penetrating, without being too overwhelming.

This exceptional collection draws on the most recent demographic data and combines classic research with cutting-edge approaches to provide an invaluable overview of the developmental psychology of the adult years. Covers a wide range of topics within adult development and aging, from theoretical perspectives to specific content areas Includes newly commissioned essays from the top researchers in the field Takes a biopsychosocial perspective, covering the biological, psychological and social changes that occur in adulthood

The new edition of Gray's acclaimed text, featuring dramatic new coverage of sensation and perception and new media tools that actively involve students in psychological research.
