The self-made millionaire and expert on do-it-yourself investing shares his personal approach to financial and investment success, based on a single, simple, risk-free Rule #1--don't invest to make money, invest to not lose money--and its corollaries, which he uses to build wealth. Reprint. 100,000 first printing.

In this book, self-made millionaire Phil Towns will show you how he turned \$1,000 into \$1 million in only five years, and then proceeded to make many millions more. Before I became “Phil Town, teacher of investing principles to more than 500,000 people a year,” I was a lot like you: someone who viewed individual stock investing as way too hard to do successfully. As a guy who barely made a living as a river guide, I considered the whole process pretty impenetrable, and I was convinced that to do it right you had to make it a full-time job. Me, I was more interested in having full-time fun. So I was tempted to do what you're probably doing right now: letting some mutual fund manager worry about growing your nest egg. Let me tell you why that decision could one day make you absolutely miserable. The fact is, because of natural market cycles, the mutual fund industry is likely to soon be facing twenty years of flat returns. That means that if you've got your nest egg tucked away in funds—especially the type found in most 401ks—your egg won't get much bigger than it is now. Translation: Get ready for a retirement filled with lots of cold cuts, plenty of quality TV-watching time, and a place to live that's too small to accommodate your visiting kids. I came to investing as a person who wasn't great at math, possessed zero extra cash, and wanted a life—not an extra three hours of work to do every day. Fortunately, I was introduced to The Rule. Rule #1, as famed investor Warren Buffett will tell you, is don't lose money. Through an intriguing process that I'll clarify in this book, not losing money results in making more money than you ever imagined. What it comes down to is buying shares of companies only when the numbers—and the intangibles—are on your side. If that sounds too good to be true, it's because the mind-set I'll be introducing you to leads not to bets but to certainties. Believe me, if there were anything genius-level about this, I'd still be a river guide collecting unemployment much of the year. Part of the secret is thinking of yourself as a business owner rather than a stock investor. Part is taking advantage of today's new Internet tools, which drastically reduce the “homework factor.” (We're talking a few minutes, tops.) Part is knowing the only five numbers that really count in valuing a potential investment. And part—maybe the most important part—is using the risk-free Rule #1 approach to consistently pay a mere 50 cents to buy a dollar's worth of a business. What I won't waste your time with is fluff: a lot of vague parables reminding you of what you already know and leaving you exactly where you started. This is the real deal, folks: a start-to-finish, one-baby-step-at-a-time approach that will allow you to retire ten years sooner than you planned, with more creature comforts than you ever imagined.

accounts yield very little return. If you're not careful, you could be looking at a very uncomfortable retirement. But surely the alternative - investing in the stock market - is risky, complicated and best left to the professionals? Phil Town doesn't think so. He made a fortune, and in Rule #1 he'll show you how he did it. Rule #1: - Sets out the five key numbers that really count when you're buying stocks and shares - Explains how to use new Internet tools to simplify research - Shows how to exploit the advantages of being an individual investor - Demonstrates how to pay fifty pence for every pound's worth of business This simple and straightforward method will guide you to 15% or better annual returns - in only 15 minutes a week. It's money in the bank!

Don't get mad, get even... Phil Town's first book, the #1 New York Times bestseller Rule #1, was a guide to stock trading for people who believe they lack the knowledge to trade. But because many people aren't ready to go from mutual funds directly into trading without understanding investing—for the long term – he created Payback Time. Too often, people see long-term investing as “mutual fund contributing” – otherwise known as “long-term hoping.” But the sad truth is that mutual fund investors are, to a stunning degree, pinning their hopes on an institution that is hopeless. It turns out that only 4% of fund managers consistently beat the S&P 500 index over the long term, which means that 96% of fund investors see a smaller return on their nest egg than a chimpanzee who simply buys stocks in the 500 biggest companies in America and watches what happens. But it's worse than that. The net effect of hitching your wagon to mutual funds is that over a lifetime they'll fritter away as much 60% of your nest egg in fees. Once you understand how funds engineer this, you'll rush to invest on your own. Payback Time's risk-free approach is called “stockpiling” and it's how billionaires get rich in bad markets. It's a set of rules for investing (not trading but investing) in the right businesses at the right time -- rules that will ensure you make the big money.

In this essential handbook—a blend of Rich Dad, Poor Dad and The Happiness Project—the co-host of the wildly popular InvestED podcast shares her yearlong journey learning to invest, as taught to her by her father, investor and bestselling author Phil Town. Growing up, the words finance, savings, and portfolio made Danielle Town's eyes glaze over, and the thought of stocks and financial statements shut down her brain. The daughter of a successful investor and bestselling financial author of Rule #1, Phil Town, she spent most of her adult life avoiding investing—until she realized that her time-consuming career as lawyer was making her feel anything but in control of her life or her money. Determined to regain her freedom, vote for her values with her money, and deal with her fear of the unpredictable stock market, she turned to her father, Phil, to help her take charge of her life and her future through Warren Buffett-style value investing. Over the course of a year, Danielle went from avoiding everything to do with the financial industrial complex to knowing exactly how and when to invest in

wonderful companies. In *Invested*, Danielle shows you how to do the same: how to take command of your own life and finances by choosing companies with missions that match your values, using the same gold standard strategies that have catapulted Warren Buffett and Charlie Munger to the top of the Forbes 400. Avoiding complex math and obsolete financial models, she turns her father's investing knowledge into twelve easy-to-understand lessons. In each chapter, Danielle examines the investment strategies she mastered as her increasing know-how deepens the trust between her and her father. Throughout, she streamlines the process of making wise financial decisions and shows you just how easy—and profitable—investing can be. Capturing a warm, charming, and down-to-earth give and take between a headstrong daughter and her mostly patient dad, *Invested* makes the complex world of investing simple, straightforward, and approachable, and will help you formulate your own investment plan—and foster the confidence to put it into action.

What happens when a young Wall Street investment banker spends a small fortune to have lunch with Warren Buffett? He becomes a real value investor. In this fascinating inside story, Guy Spier details his career from Harvard MBA to hedge fund manager. But the path was not so straightforward. Spier reveals his transformation from a Gordon Gekko wannabe, driven by greed, to a sophisticated investor who enjoys success without selling his soul to the highest bidder. Spier's journey is similar to the thousands that flock to Wall Street every year with their shiny new diplomas, aiming to be King of Wall Street. Yet what Guy realized just in the nick of time was that the King really lived 1,500 miles away in Omaha, Nebraska. Spier determinedly set out to create a new career in his own way. Along the way he learned some powerful lessons which include: why the right mentors and partners are critical to long term success on Wall Street; why a topnotch education can sometimes get in the way of your success; that real learning doesn't begin until you are on your own; and how the best lessons from Warren Buffett have less to do with investing and more to do with being true to yourself. Spier also reveals some of his own winning investment strategies, detailing deals that were winners but also what he learned from deals that went south. Part memoir, part Wall Street advice, and part how-to, Guy Spier takes readers on a ride through Wall Street but more importantly provides those that want to take a different path with the insight, guidance, and inspiration they need to carve out their own definition of success.
