Teradata Database Administration ? The Fundamentals by Tom ...

File Type PDF Teradata Database Administration

Role Description. The Database Administrator (DBA) requires specific technical knowledge about the administration and control of the data warehouse environment, including the database, operating systems and tools. The DBA will provide services to administer, maintain, and control the data warehouse including the database, operating systems, and tools.

Database Administrator at Teradata

As Teradata Database Administrator, you will: Perform the DBA related tasks in key areas of Database, Performance Management & Reporting for customers. Configure and maintain backup and recovery procedures. Manage users and permissions based on the level of roles and security matrix.
