<b>Brown Bear—Ursus arctos   Facts About Animals</b>
Ursus arctos is one of the largest living carnivores. However, the size and weight of this bear varies considerably between populations. It is a consequence of both genetic factors and nutrition. The Brown Bear is 1 to 3 m in length from head to rump and 90 to 150 cm tall at the shoulder.

<b>Brown Bear (Ursus aretos) information   Giraffa—helping ...</b>
The brown bear is omnivorous. It eats berries, roots, fungi, grasses, fish, carrion, small mammals and insects. It is very good at catching fish and it often uses its long claws to dig insects out of rotting logs and small mammals out of their burrows. Some brown bears in the Canadian Rockies hunt larger animals like moose, elk and goats.
